

Free SMS Module for Magento eCommerce

Installation

The MBLSMS Notification Module is extremely easy to install. The module is readily packaged to be installed through Magento Connect Manager. Just download the package from <https://mblsms.com/integrations/magento-sms> and install it. We highly recommend you to clear the cache after the installation is complete.

Options

MBLSMS Options

Thank you for using MBLSMS gateway to notify your customers. To obtain Auth Token, please register on <https://www.mblsms.com> If you experience any problems, please contact our support department by sending an e-mail to support@mblsms.com

Send From [STORE VIEW]
▲ Message Send from.

Mobile Code [STORE VIEW]
▲ Mobile country code.

SMS Auth Token [STORE VIEW]
▲ Authorization token from MBLSMS

Save Config

Send From	This would be the originator of your messages.
Mobile Code	You need to set your country dialing code here. When your customer input their phone as 07950282828, the module would automatically transfer the mobile in international format when sending SMS
SMS Auth Code	This is your authorisation code, used to authenticate you in our system. To get Auth Key, login to our customer portal at https://client.mblsms.com . Navigate

	to Account > Account Settings. Click the Generate button, which will produce your unique Auth Key.
